- 64 oz. BPA-free container with 2 piece lid and tamper included for extra convenience
- High performance and quality backed by a one year warranty; 120V, 1500W

Certifications

Notes & Details

The AvaMix BL2VS 64 oz. commercial blender with toggle controls and a variable speed dial delivers the power and versatility needed in a blender that will reliably churn out smoothies and frozen cocktails at busy bars or restaurants. The compact base packs a powerful punch thanks to a 2 hp motor that boasts an impressive 1500W, combining with heavy-duty stainless steel blades to effectively crush ice, mix drinks, or even blend together house-made spreads and salsa!

Operation couldn't be any easier. A simple toggle switch powers the blender on and off, while a simple dial control lets you set the blending speed, giving you a nice balance between the simplicity of a pure toggle control blender and the finesse of a model with electronic controls. When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse switch to throttle the unit to its highest speed.

The 64 oz. BPA-free tritan jar design provides maximum durability while offering plenty of room for large batches. A 2-piece lid lets you add ingredients to the blender at any stage in the mixing process - simply remove the clear center lid and use the included tamper to push the add-ins down into the jar. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender requires a 120V electrical connection.
